

PRODUCT PRE-RELEASE

AVAILABLE SOON THROUGH LIGHT FLEET SAFETY SOLUTIONS

THE ULTIMATE WORK HORSE

LIGHTER STRONGER SAFER

NEW HEAVY DUTY STEEL TRAY

The all new, multi purpose steel tray design from Minecorp will be available soon.

Designed using 3D computer aided design and manufactured utilising CNC machinery, the frame has been constructed from fabricated steel and features:

- Provisions for a steel floor (bolted or welded) or an aluminium floor (bolted)
- The option of steel drop sides or aluminium extruded drop sides (steel drop sides shown)

SPECIAL FEATURES INCLUDE

- Engineered to reduce the weight of traditional steel trays
- Removable internal tie down points within the tray and on the headboard; allows for secure storage of smaller accessories
- CNC mandrel bent, dynamically tested cold drawn tube headboard (structurally connected to the vehicles chassis)

or

- Standard headboard variations are also available
- Optional Laser cut rated mesh load guard (AS4034)
- Greater access under the tray for increased storage capacity options
- Range to incorporate all major makes and models
- Designed to suit ancillary equipment
